

In the name of Allah.

I am Omid Razvani Rad, son of Abbas. I was born in Zabol, where I spent primary and secondary education. I was admitted to the undergraduate chemistry department of Sistan and Baluchestan in 1998 and graduated in 2003. I passed my master degree from 2005 to 2007 at the same university. Since 2014, I've been a Ph.D. student in the field of physical chemistry at the same university. My job is also a teacher.
